- Well versed with the SDLC, STLC and testing concepts and methodologies
- Worked on Manual testing which includes Smoke Testing, Functional Testing, Regression testing, System Integration Testing, Sanity testing, Database testing.
- Worked on Automation testing for Web based applications using **Cucumber and BDD Framework**.
- Involved in the Continuous Integration of the automation framework with **Jenkins**.
- Hands on experience on tools like **Eclipse, HP ALM, JIRA, Zephyr, Confluence, Bitbucket, GIT**.
- Experience in **Data Analysis, Data Validation, Data Verification and identifying data mismatch**
- Experience in writing **SQL Queries to check the integrity of data to perform database testing**.
- Used Impala and Hive for Hadoop/big data testing.

WORK EXPERIENCE:

- Currently working with **Capgemini Technology Services India Ltd** as Senior Automation Engineer and joined in Jan 2022.
- Worked at **Tata Consultancy Services** since Feb 2013 to Dec 2021 as Automation Test Engineer

TECHNICAL EXPERTISE:

TESTING METHODOLOGIES	Agile, Waterfall
PROGRAMMING LANGUAGES	Core Java
TOOLS	Selenium WebDriver, Cucumber, BDD Framework, Rest Assured, Eclipse, HP-ALM, JIRA, Oracle, HIVE, IMPALA, Confluence, Testng.
Continuous Integration Tools	Jenkins
Version Control	GIT, Bitbucket
OPERATING SYSTEM	WINDOWS XP/7
DOMAIN EXPERIENCE	Banking and Financial Services

ACADEMIC DETAILS:

Course	Board/University	Year	Percentage
B-Tech	Rajasthan Technical University	2008(May)-2012(June)	66 .20
12 th	CBSE	2006(May)	62
10 th	CBSE	2004	88 .17

PROJECTS HANDLED:

Project	Collateral Management System (CMS) – Maybank
Role	Senior Test Analyst
Duration	Jan 2022 – till date
Description	<ol style="list-style-type: none">1. CMS enables ability to capture and create collaterals for customers in the credit approval process supporting multiple collateral types.2. Supporting policy and processes around perfection, valuation and charge details.3. Extract of collateral information for Regulatory Reporting, Credit RWA computation, Data Analytics and MIS.
Responsibilities	<ul style="list-style-type: none">• Involvement in Preparation of Automated and Manual Test Scripts and Test Data.• Involvement in Preparation of BDD Cucumber Test Framework• Involvement in Preparation of Automation Scripts using Selenium Web-Driver• Integrated the test suites to Jenkins to execute them automatically after every successful deployment• Involvement in API Testing using Rest Assured• Involvement in ETL Testing of Extracts created by CMS for downstream system• Involvement in the System Test Plan Preparation and Requirements Streamlining, Documenting TCR and TIC reports• Involvement in Preparation of Test Scenarios, Cases and Test Data.• Involvement in Test Execution (includes Sanity, Regression, System, Integration, system testing and Ad-hoc Testing, Batch process Testing). Results Analyzing and Defect Reporting• Logging and Tracking of defects in JIRA, Report Generation for tracking the defect status.• Preparation of Daily Status Report which include the Testing Status, Defect Status.

Project	Payments Monitoring and Reporting (Royal Bank of Scotland Group)
Role	Test Lead
Duration	June 2018 – Dec 2021
Description	<ol style="list-style-type: none"> 1. Payments Monitoring and Reporting is the project where we build a set of canned reports for Payments and Business Management covering UK and International direct/indirect settlement mechanisms. 2. Provisioning the historical payments and settlement data, as required by business, from the legacy and strategic payment engines to strategic data stores.
Responsibilities	<ul style="list-style-type: none"> • Involvement in Preparation of Automated and Manual Test Scripts and Test Data. • Involvement in Preparation of BDD Cucumber Test Framework • Involvement in Preparation of Automation Scripts using Selenium Web-Driver • Involvement in the System Test Plan Preparation and Requirements Streamlining, Documenting TCR and TIC reports • Involvement in Preparation of Test Scenarios, Cases and Test Data. • Involvement in Test Execution (includes Sanity, Regression, System, Integration, system testing and Ad-hoc Testing, Batch process Testing). Results Analyzing and Defect Reporting • Logging and Tracking of defects in JIRA, Report Generation for tracking the defect status. • Preparation of Daily Status Report which include the Testing Status, Defect Status. • Running the Defect Triage Call on a Daily basis.

Project	SEPA Archiving (RBS Group)
Role	Test Engineer
Duration	Dec 2016 – May 2018
Description	SEPA Archiving is built for the Archiving solution for historical Payments transactional data.
Solution Environment	Dev, QA, UAT and Production

Responsibilities	<ul style="list-style-type: none"> • Involvement in Preparation of Automated Test Scripts and Test Data. • Involvement in Preparation of Data Driven Test Framework • Involvement in Preparation of Automation Scripts using Selenium Web-Driver • Involvement in ETL testing to compare the data • Involvement in the System Test Plan Preparation and Requirements Streamlining. • Involvement in Preparation of Test Scenarios, Cases and Test Data. • Involvement in Test Execution (includes Sanity, Regression, System, Integration, system testing and Ad-hoc Testing). Results Analyzing and Defect Reporting • Logging and Tracking of defects in JIRA, Report Generation for tracking the defect status. • Coordination with the development team to resolve the defects. • Preparation of weekly and monthly status reports.
------------------	---

Client	Scottish Widows - Lloyd banking group plc (LBG)
Project	Insurance Banking Project
Role	Support Analyst
Duration	May 2013 - Nov 2016
Description	<ul style="list-style-type: none"> • Insurance Banking Project involved in Support Activity for different inhouse tools in Prod and QA Env.
Solution Environment	Dev, QA and Production
Responsibilities	<ul style="list-style-type: none"> • Involvement in analyzing the raised ticket by users for ALIS tool and applying the required solution.

Training	Initial Learning Program (ILP)
Project worked	Bank-Commercial Account Opening & Maintenance (CAOM)
Role	ILP Participant (Trainee)
Duration	Feb 2013-April-2013
Description	<ul style="list-style-type: none"> • CAOM can be used for bank to open the commercial account for their business customers and also to maintain them and it will be used for different types of users, managing customer details and also their account details.

ACHIEVEMENTS:

- Received Star of the month award.
- Received On the Spot Award as Awards for Excellence from Project Manager for finishing testing of Various application of Transition Packages within stipulated period of time which led to Go Live of applications without deviation from original plan

PERSONAL DETAILS:

Date of Birth	August 07, 1988
Nationality	Indian
Languages Known	English, Hindi
Marital Status	Married
Address	Vatika India Next, Sector 82, Gurgaon
